

I am shocked to hear of the NAB petition #04-160 to prevent satellite radio from broadcasting Instant Traffic and Weather. In the short time I have subscribed to XM Satellite Radio, it has been a valuable help to me as I have traveled in Baltimore and other areas, saving me from getting stuck in traffic jams, and wasting gas. There is no legitimate reason for this bill even to be heard. Please do not let the NAB take away another precious freedom by this unnecessary bill.

Thank you for hearing the voice of an average American!
